Overview

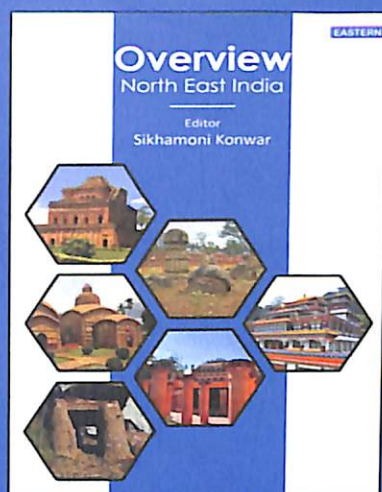

North East India

Editor
Sikhamoni Konwar

The Book

Overview is a compilation of varied research articles on different aspects of history, culture, economy, religion, ethnicity, archaeology etc. of North East India by eminent historians, academicians, researchers and scholars from India and abroad. The issues covered in the book are of much historical as well as contemporary interest. In view of the increasing significance of the North-East region in the context of India's "Act East Policy" and its historical and ethnic affinity with China, Myanmar and other South-East Asian countries, the book will go a long way to incite constructive inquisitiveness for the North-East region in the minds of the discerning readers and researchers.

As there is an enormously large amount of books, magazines, journals, news papers etc, the old traditional methods of libraries keeping physical books are becoming futile. In such problems digitalization of libraries comes to our aid as we can save an extensively large amount of information in a device as small as a pen-drive, compact disk etc. The book 'Digital Library- issues Challenges and opportunities' published in the occasion of the national workshop on Library in the digital environment revolves around the importance of digitalization of libraries and the problem related to it. The ideas of many scholars and resource personals are collaborated together in this issue.
